

Hafnium Dioxide Deposition Material

HfO₂

Product family: Targets & Evaporation

SUPPLY FORMS	INFORMATION FOR A PRECISE RFQ
- Dense sputtering target - Bonded target assembly - Evaporation pellets - Granules or pieces	- Deposition method - Purity - Target dimensions or source form - Density - Bonding requirement - Quantity

TYPICAL APPLICATIONS

- High-k dielectric films
- Semiconductor research
- Optical coatings
- Gate-stack development

ORDER AND DOCUMENTATION

Final purity, composition, dimensions, tolerances, analysis documentation, quantity, lead time and DAP or EXW delivery terms are confirmed in the Adesis quotation. Values in this guide are descriptive and do not constitute a binding product specification.
